Introduction

- AI Engineer with **8+ years in software development** and **5+ years in training and deploying AI models**.
- Specializing in **LLMs**, **Multimodal AI** and **Embodied AI** with experience **building scalable training pipelines** and **optimizing model performance**.
- Focused on **open-source AI tooling**, **reproducible systems** and **efficient model architectures**.

Experience

AKINROBOTICS Sept 2022 - Present
AI Engineer Konya, Turkey

- Designed and implemented scalable NLP and multimodal training pipelines (LLM, ASR, TTS) using PyTorch-based ecosystems, enabling context-aware robotic interactions.
- Developed and optimized multimodal LLM systems (text, speech, vision, tool-calling) with a focus on model efficiency, latency reduction and real-world deployment constraints.
- Built end-to-end embodied AI architectures integrating sensor data, grounding strategies and hardware-aware inference pipelines.
- Led experimentation workflows including fine-tuning, evaluation and reproducibility practices for production-grade AI systems.

ABRANERO June 2021 - Aug 2022
Full Stack Developer Remote

- Designed and implemented backend services and API architectures supporting scalable mobile applications.
- Developed real-time features including authentication, payment integration and accessibility-focused services (OCR, voice control, location tracking).
- Architected database schemas and service layers with a focus on performance, maintainability and production reliability.

TUBITAK SAGE Aug 2020 - Sept 2020
Summer Intern Ankara, Turkey

- Applied bio-inspired optimization techniques (Genetic Algorithms) to tune PID controllers in defense-oriented control systems.
- Improved controller stability and response characteristics through simulation-driven parameter search.

Education

MS **Mechatronics Engineering**, Selcuk University Sept 2025 - Present

- Focus: Multimodal Models, Embodied Agents

BS **Mechatronics Engineering**, Necmettin Erbakan University Sept 2017 - June 2021

- Minor: Computer Engineering

Skills

Programming: Python (advanced), C/C++, Rust, Go
AI Frameworks & Ecosystem: PyTorch, HuggingFace Transformers, Accelerate, Diffusers, TorchAudio, TorchVision
LLM & Multimodal Systems: LLM Fine-tuning, LoRA / PEFT, RAG Architectures, VLMs, Tool Calling, Model Context Protocol, Conversational AI, AI Assistant, ASR / TTS Pipelines, Embodied Agents
Training & Performance Optimization: Knowledge Distillation, Model Quantization, RLHF / DPO, CUDA, vLLM
Deployment & Infrastructure: ONNX, ONNX Runtime, Docker, Linux, Git, GitLab CI/CD, DevOps, FastAPI, ROS

Activities

Medium May 2019 - Present
Technical Writer · Technical Writing

- Published articles on AI, software engineering and technical books, reaching 100K+ total views.
- Wrote in-depth technical content on LLMs, AI systems and engineering practices.

Deneyap Türkiye Sept 2021 - May 2022
AI & Robotics Instructor · STEM Education

- Delivered programming, robotics and AI courses to middle and high school students.
- Mentored two student teams for Teknofest technology competition projects.
