Introduction

- AI Engineer with **5+ years** in **software engineering** and experience in **AI model training and deployment**.
- Specializing in **LLMs**, **Multimodal AI** and **Embodied AI** with experience **building scalable training pipelines** and **optimizing model performance**.
- Focused on **open-source AI tooling**, **reproducible systems** and **efficient model architectures**.

Experience

AKINROBOTICS

AI Engineer

Sept 2022 - Present

Konya, Turkey

- Designed and implemented scalable NLP and multimodal training pipelines (LLM, ASR, TTS) using PyTorch-based ecosystems, enabling context-aware robotic interactions.
- Developed and optimized multimodal LLM systems (text, speech, vision, tool-calling) with a focus on model efficiency, latency reduction and real-world deployment constraints.
- Built end-to-end embodied AI architectures integrating sensor data, grounding strategies and hardware-aware inference pipelines.
- Led experimentation workflows including fine-tuning, evaluation and reproducibility practices for production-grade AI systems.

ABRANERO

Full Stack Developer

June 2021 - Aug 2022

Remote

- Designed and implemented backend services and API architectures supporting scalable mobile applications.
- Developed real-time features including authentication, payment integration and accessibility-focused services (OCR, voice control, location tracking).
- Architected database schemas and service layers with a focus on performance, maintainability and production reliability.

TUBITAK SAGE

Summer Intern

Aug 2020 - Sept 2020

Ankara, Turkey

- Applied bio-inspired optimization techniques (Genetic Algorithms) to tune PID controllers in defense-oriented control systems.
- Improved controller stability and response characteristics through simulation-driven parameter search.

Education

MS Mechatronics Engineering, Selcuk University

Sept 2025 - Present

- Focus: Multimodal Models, Embodied Agents

BS Mechatronics Engineering, Necmettin Erbakan University

Sept 2017 - June 2021

- Minor: Computer Engineering

Skills

Programming: Python (advanced), C/C++, Rust, Go

AI Frameworks & Ecosystem: PyTorch, HuggingFace Transformers, Accelerate, Diffusers, TorchAudio, TorchVision

LLM & Multimodal Systems: LLM Fine-tuning, LoRA / PEFT, RAG Architectures, VLMs, Tool Calling, Model Context Protocol, Conversational AI, AI Assistant, ASR / TTS Pipelines, Embodied Agents

Training & Performance Optimization: Knowledge Distillation, Model Quantization, RLHF / DPO, CUDA, vLLM

Deployment & Infrastructure: ONNX, ONNX Runtime, Docker, Linux, Git, GitLab CI/CD, DevOps, FastAPI, ROS

Activities

Medium

May 2019 - Present

Technical Writer · Technical Writing

- Published articles on AI, software engineering and technical books, reaching 100K+ total views.
- Wrote in-depth technical content on LLMs, AI systems and engineering practices.

Deneyap Türkiye

Sept 2021 - May 2022

AI & Robotics Instructor · STEM Education

- Delivered programming, robotics and AI courses to middle and high school students.
- Mentored two student teams for Teknofest technology competition projects.
